Who would NOT be a candidate for colon hydrotherapy treatments?

If you have a concern about your health or the appropriateness of colon hydrotherapy you should consult a doctor.

If you are diagnosed with

Acute Colitis	Diverticulosis (acute/severe)
Anal Fissure/Fistula (a tear in the colon)	GI Hemorrhage/Perforation
Anemia (severe)	Hemorrhoids (severe/bleeding, although minimal bleeding is okay)
Aneurysm	Hernia (abdominal/inguinal)
Cardiac Disease -	Kidney Dialysis
(uncontrolled hypertension or congestive heart failure)	Pregnancy (up to 4 months) - (under the direction of your physician)
Cirrhosis	Rectal Bleeding (other than minor hemorrhoids)
Colon Cancer	Renal Insufficiency
Colon Surgery (less than six months post-op)	Tumor in the Rectum or Large Intestine
Colostomy	Ulcerative Colitis (active or bleeding)
Crohn's disease (acute inflammatory or bleeding stages)	

Professionally administered by a licensed Colon Hydrotherapist is generally safe if you are free of the above cited conditions/contraindications.

A contraindication is any indication that makes it inadvisable to use Colon Hydrotherapy. If any of these conditions apply to you we will not be able to use the therapy on you at the present time. If you have any of these contraindications you may still be eligible to receive colon hydrotherapy once they have subsided or been eliminated or if you are under the order, guidance and supervision of a qualified physician to be released to receive colon hydrotherapy.
